

Course Name:

Further Offshore Emergency Training (FOET) with Compressed Air Emergency Breathing System (CA-EBS)

Short Description:

This OPITO approved 1 day FOET with Compressed Air Emergency Breathing System (CA-EBS), will re-introduce delegates to the specific safety issues and regimes relevant to offshore installations.

Course Type:

Offshore Courses

Full Description:

This OPITO Standard has been developed specifically to meet Aviation Regulation requirements in the UK.

- **Aims**

The aim of the FOET (with CA-EBS) is to provide the delegates with the opportunity to practise and demonstrate emergency response skills which are not possible to practise during drills, exercises and emergency training offshore.

- **Objectives**

The objectives of the FOET (with CA-EBS) are that delegates will be able to:

Demonstrate, in a simulated environment, that they can use the safety equipment and follow procedures in preparing for and during helicopter emergencies – with particular focus on escaping from a helicopter following ditching.

Demonstrate that they can use basic firefighting equipment effectively, and use self-rescue techniques in low visibility and completely obscured visibility situations e.g. smoke filled areas.

Demonstrate that they can perform basic first aid.
