

Course Name:

Combined Basic Offshore Safety Induction & Emergency Training (BOSIET) - OPITO Approved

Short Description:

This OPITO approved 3 day combined BOSIET infuses the Emergency Breathing System and the Compressed Air Emergency Breathing System and will introduce delegates to the specific safety issues and regimes relevant to offshore installations.

Course Type:

Offshore Courses

Full Description:

The Course will introduce delegates to the specific safety issues and regimes relevant to offshore installations. Also to equip delegates with the basic emergency response knowledge and skills for travelling to and from offshore installations by helicopter, with the use of EBS and CA-EBS emergency equipment.

This course is a mix of theoretical and practical sessions, during which delegates will be required to demonstrate their level of knowledge and understanding of the training programme content.

By the end of this training programme, delegates will:

Have knowledge of the offshore industry including: Offshore hazards & control measures, offshore safety management, how offshore safety is regulated and living & working in the offshore environment.

Understand the processes involved in helicopter travel & be competent in their ability to escape from a ditched or ditching helicopter in an emergency situation.

Have knowledge of what to do in an evacuation situation: How to respond to alarms, the systems used to achieve successful evacuation and he actions to take in the event of a water entry situation.
